

## **Boaters Really Do The Right Thing!**

**Boaters: We are ALL doing our part on sewage pump-outs AND here's your chance to set directions for Washington SeaGrant programs.**

The State Parks "Clean Vessel Program" actually monitors and tallies gallons of sewage pumped from boats at ALL the State's pump-out stations. Results for last year (2015) continue the trend that more and more boater's sewage is pumped out and never goes into the State's waters -- here are the figures:

2010	3,614,381 gallons
2011	4,093,514 gallons
2012	3,468,322 gallons
2013	5,699,962 gallons
2014	6,092,899 gallons
2015	8,359,046 gallons

**Total since count started: 31,328,124 gallons!**

Congratulations to all of us who are doing the "right thing" - proof that boaters DO CARE about the environment!
